PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience delivering production web applications, with deep PHP/Laravel expertise and hands-on work in React, JavaScript, and API integration. Builds secure REST APIs, authentication, payments, and booking workflows, and ships them through Docker and CI/CD pipelines (GitHub Actions). Leads backend delivery for a four-developer team on a live multi-platform marketplace, with proven impact on performance and production reliability; currently deepening DevOps skills in Kubernetes and Terraform.

TECHNICAL SKILLS

Backend: PHP, Laravel, REST APIs, API Versioning, JWT, Authentication & Authorization, Payments Integration, Service & Repository Patterns, SOLID

Frontend: JavaScript, React, HTML, CSS, API Integration; learning Next.js

DevOps & Delivery: Docker, GitHub Actions, CI/CD, Git, GitHub, Linux, AWS (fundamentals); learning Kubernetes and Terraform

Databases: MySQL, PostgreSQL, SQL Server, Oracle, Redis; Data Modeling, Indexing, Transactions, Query Optimization

Additional: Spring Boot, ASP.NET Core, Entity Framework Core, LINQ

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | Backend & DevOps **Feb 2025 – Present**

RunSoft, Cairo, Egypt

BayToStay – Airbnb-style property rental marketplace on web, iOS, and Android (Website | App Store | Google Play)

- Lead backend delivery for a four-developer team: solution design, task breakdown, code reviews, and technical guidance, while staying hands-on with implementation.
- Own major backend features for a platform serving thousands of users, property units, and bookings across guest, host, and admin workflows.
- Designed versioned REST APIs with JWT authentication, role-based permissions, social login, OTP, Firebase push notifications, and real-time chat via Pusher.
- Built the end-to-end booking journey (discovery, availability, pricing, host approval, payments, wallets, search, and admin tools) with transactional data integrity and clear service boundaries.
- **Reduced a critical API response time from ~4s to 0.5s (87.5%)** through query restructuring, indexing, eager loading, and pagination.
- Contribute to Docker-based, CI/CD-driven delivery and resolve production issues involving slow queries, N+1 patterns, database load, payment callbacks, deployment conflicts, and third-party integrations.
- Delivered Laravel backend features and APIs for *Factories Online*, a B2B e-commerce platform, in collaboration with product and frontend teams.

Backend Developer **Jul 2023 – Jul 2024**

Flex Agency, Cairo, Egypt

- Developed and maintained PHP/Laravel applications and REST APIs serving web and mobile clients.
- Translated product requirements into backend features, database schemas, integrations, and reusable services, collaborating with frontend, mobile, and product teams from planning through release.

EDUCATION & LANGUAGES

Bachelor's Degree **Sep 2019 – Oct 2023**

Ain Shams University, Cairo, Egypt

Arabic: Native | **English:** Professional working proficiency
